Project Work Report Guidelines

- Project reports should be typed neatly only on one side of the paper with 1.5 or double line spacing on a A4 size paper (210 x 297 mm).
- The margins should be: Left – 1.25″, Right – 1″, Top and Bottom – 0.75″.
- The Project Report should be Hard binding (Cream Colour) of minimum 30 Pages.

The total number(6) of reports to be prepared:

One copy to the department
One copy to the concerned guide(s)
One copy to the each teamate.

1. Before taking the final printout, the approval of the concerned guide(s) is mandatory and suggested corrections, if any, must be incorporated.
2.The organization of the report should be as follows

Inner title page
Abstract or Synopsis
Acknowledgments
Table of Contents
List of table & figures (Usually numbered in roman)

Chapters (to be numbered in Arabic)

Chapter 1 Introduction - 4 Pages

Chapter 2 Problem statement 1 or 2 Pages

Chapter 3 System Requirement Specifications 2 or 3 Pages

Chapter 4 System Design 6 or 8 Pages

Chapter 5Implementation 6 or 8 Pages

Chapter 6 Testing 2 Pages

Chapter 7 Test cases and Results (Snapshots) 8 or 10 Pages

Conclusion and Future Enhancements

Research paper (Accepted by any IEEE Conference along with acceptance email proof)

Bibliography

Appendix A: List Of Figures

Appendix B: List Of Tables

The chapters, sections and subsections may be numbered in the decimal form for e.g. Chapter 2, sections as 2.1, 2.2 etc., and subsections as 2.2.3, 2.5.1 etc.

3. The chapter must be left or right justified (font size 16). Followed by the title of chapter centred (font size 18), section/subsection numbers along with their headings must be left justified with section number and its heading in font size 16 and subsection and its heading in font size 14. The body or the text of the report should have font size 12.

4. The figures and tables must be numbered chapter wise for e.g.: Fig. 2.1 Block diagram of …., Table 3.1 Primitive flow table, etc.

5. The last chapter should contain the summary of the work carried, contributions if any, their utility along with the scope for further work.

Reference OR Bibliography: The references should be numbered serially in the order of their occurrence in the text and their numbers should be indicated within square brackets for e.g. [3]. The section on references should list them in serial order in the following format.

For textbooks – A.V. Oppenheim and R.W. Schafer, Digital Signal Processing, Englewood, N.J., Prentice Hall, 3 Edition, 1975.
For papers – Devid, Insulation design to combat pollution problem, Proc of IEEE, PAS, Vol 71, Aug 1981, pp 1901-1907.

6. All equation numbers should be right justified.

7. Hardware projects must include: the component layout, complete circuit with the component list containing the name of the component, numbers used, etc. and the main component data sheets as Appendix.

8. Software projects must include a virus free disc, containing the software developed by them along with the read me file. Read me file should contain the details of the variables used, salient features of the software and procedure of using them: compiling procedure, details of the computer hardware/software requirements to run the same, etc. If the developed software uses any public domain software downloaded from some site, then the address of the site along with the module name etc. must be included on a separate sheet. It must be properly acknowledged in the acknowledgments.

9. The project report should be brief and include descriptions of work carried out by others only to the minimum extent necessary. Verbatim reproduction of material available elsewhere should be strictly avoided. Where short excerpts from published work are desired to be included, they should be within quotation marks appropriately referenced.

10. Proper attention is to be paid not only to the technical contents but also to the organization of the report and clarity of the expression. Due care should be taken to avoid spelling and typing errors. The student should note that report-write-up forms the important component in the overall evaluation of the project.

11. The reports must be Hard binded (Cream Colour), Separator sheets, used if any, between chapters, should be of thin page.
